

This telephone survey was conducted from May 2 - 6, 2019 throughout the town of Hamden, Connecticut.

Responses are reported for 1,699 adults with a margin of sampling error of +/- 3.1 percentage points, including the design effect. Margins of sampling error for subgroups are available upon request.

Surveys are conducted with live interviewers calling landlines and cell phones.

All data was collected and tabulated by the Quinnipiac University Poll.

#### METHODOLOGICAL DETAILS

Dual frame landline and cell phone samples are generated by Dynata, formerly Survey Sampling International (SSI).

For landlines, area code exchanges were selected based on the percentage that fell within Hamden zip codes. Phone numbers were then randomly generated within these area code exchanges. For cell phones, numbers from the rate center encompassing the greater Hamden area were matched to billing zip codes for Hamden. A random selection of these numbers was selected based on geographic representation of the zip codes within Hamden.

Landline numbers and cell phone numbers are scheduled for 5+ call attempts. When calling landlines, interviewers ask to speak with the adult member of the household having the next birthday. Interviews are conducted on cell phones with both cell only and dual owner respondents.

Questions are asked as they appear in the release document. If a question is asked of a subset of the sample, a descriptive note is added in parentheses preceding the question. Questions are numbered as asked with additional questions found in successive releases.

This survey uses statistical weighting procedures to account for deviations in the survey sample from known population characteristics, which helps correct for differential survey participation and random variation in samples. The overall adult sample is weighted to recent Census data using a sample balancing procedure to match the demographic makeup of the population by zip code, gender, age, education and race.

Polls are funded entirely by Quinnipiac University. The Quinnipiac University Poll is part of the Department of Public Affairs.
