**DE BLASIO LEADS SEE-SAW NEW YORK CITY MAYORAL RACE,
QUINNIPIAC UNIVERSITY POLL FINDS;
STOP-AND-FRISK COULD BE HELPING NEW FRONT-RUNNER**

With strong support from white Democratic likely primary voters and voters critical of the so-called stop-and-frisk police tactic, Public Advocate Bill de Blasio leads the Democratic race for New York City mayor with 30 percent, according to a Quinnipiac University poll released today.

With four weeks to go, City Council Speaker Christine Quinn has 24 percent, with 22 percent for former Comptroller William Thompson, 10 percent for former U.S. Rep. Anthony Weiner, 6 percent for Comptroller John Liu, 1 percent for former Council member Sal Albanese and 7 percent undecided, the independent Quinnipiac (KWIN-uh-pe-ack) University poll finds.

Stop-and-frisk is excessive and harasses innocent people, 60 percent of likely Democratic primary voters say, while 31 percent say it is an acceptable way to make the city safer. Among those critical of stop-and-frisk, 34 percent back de Blasio, with 24 percent for Thompson and 22 percent for Quinn.

Democratic likely voters support 66 – 25 percent the creation of an inspector general to independently monitor the New York Police Department.

There is a measurable racial divide as black voters go 39 percent for Thompson, 22 percent for de Blasio and 18 percent for Quinn. White voters go 39 percent for de Blasio, 31 percent for Quinn and 12 percent for Thompson.

Gender does not appear to be a factor as women go 31 percent for de Blasio, 26 percent for Quinn and 23 percent for Thompson. Men go 30 percent for de Blasio, 22 percent for Quinn and 20 percent for Thompson.

“A few weeks ago, Public Advocate Bill de Blasio looked like an also-ran. Today, he’s the leader of the pack, and a winner in the runoffs. Follow the bouncing ball, folks. This line-up keeps changing,” said Maurice Carroll, director of the Quinnipiac University Polling Institute.

-more-

Quinnipiac University Poll/August 13, 2013 – page 2

“Nobody thinks former U.S. Rep. Anthony Weiner will pack it in, but 52 percent of likely Democratic primary voters wish he’d go away and 51 percent say they’d never vote for him,” Carroll said.

“Two related issues which seem to resonate with Democratic voters are stop-and-frisk and the creation of an inspector general for the New York Police Department. U.S. District Court Judge Shira Scheindlin did her part for the voters by appointing a federal monitor for the NYPD. If politicians follow the poll results too, the NYPD is going to get still another outside monitor.”

De Blasio leads in a Democratic primary runoff:

- 54 – 38 percent over Quinn;
- 50 – 41 percent over Thompson;
- 72 – 22 percent over Weiner.

In another possible runoff, Thompson leads Quinn 51 – 41 percent.

Having a “strong personal moral character” describes de Blasio “a great deal” or “a good amount,” a total of 63 percent of Democrats say. A total of 51 percent say having “the right experience” describes him “a great deal” or “a good amount,” and 58 percent say “understands the problems of people like you” describes him “a great deal” or “a good amount.”

Quinn gets a 46 “great” or “good” score for moral character, 58 percent great or good for experience and 41 percent great or good for “understanding the problems of people like you.”

Thompson gets a 61 percent score for moral character, 56 percent for experience and 55 percent for “understanding the problems of people like you.”

Only 46 percent of Democratic likely primary voters say they definitely will vote for the candidate they name today, while 16 percent say they are unlikely to change their mind and 34 percent say they are likely to change their mind. Only 38 percent of de Blasio supporters are definite, compared to 42 percent for Quinn and 54 percent for Thompson.

From August 7 – 12, Quinnipiac University surveyed 579 likely Democratic primary voters with a margin of error of +/- 4.1 percentage points. Live interviewers call land lines and cell phones.

The Quinnipiac University Poll, directed by Douglas Schwartz, Ph.D., conducts public opinion surveys in Pennsylvania, New York, New Jersey, Connecticut, Florida, Ohio, Virginia, Colorado, Iowa and the nation as a public service and for research.
